

# Newton's Grove School

**Fostering a safe and supportive community that challenges and inspires the minds, hearts, and voices of our students, enabling them to define and achieve their own version of success and make positive differences in an ever changing world**

*Experience Extraordinary*

A photograph of the entrance to Newton's Grove school, featuring large glass doors and windows. Two students in school uniforms and backpacks are walking towards the entrance. The building's name 'NEWTON'S GROVE' is visible on the facade. The image is overlaid with a semi-transparent orange filter. In the bottom left corner, there are several white circles of varying sizes.

# The Newton's Grove Experience

Newton's Grove is a student-focused private school for children from Pre-Kindergarten to Grade 12, with two vibrant campuses.

For almost 50 years, Newton's Grove has inspired students from Junior Kindergarten to Grade 12 to think boldly, learn deeply, and grow with confidence.

Our brand-new Etobicoke Primary Campus is home to our youngest learners in the area- Pre-K to Grade 3. It is a warm and nurturing space where curiosity and creativity come alive. Here, every child is known, supported, and encouraged to explore the joy of learning.

From there, students continue their journey at our Main Campus, a dynamic JK to Grade 12 community offering small classes, caring teachers, and state-of-the-art facilities surrounded by 100 acres of stunning green space.

With strong programs in academics, athletics, and the arts, including our Signature Programs in Music, Drama, Athletics and Education Support, Newton's Grove prepares students to succeed in university, career, and life.

At Newton's Grove, we don't just teach, we ignite thinkers, creators, and leaders ready to shape tomorrow.

### Approach

Our holistic approach focuses on all aspects of a student's development; the academic, the physical, the creative, and the social, with an emphasis on developing a positive attitude, self-discipline, accountability, and personal responsibility. We foster the development of academic skills and knowledge, ability in STEAM, and engagement in the arts, physical activity, and athletics. In doing so, we challenge each student to strive for excellence, to think for themselves, and to find their own voice.

### Academics

Our enriched, inquiry-based curriculum encourages every student to think independently, ask questions, and become a problem solver, while focusing on global competencies including creativity, digital literacy, innovation, and entrepreneurship.

By setting high standards and maintaining small classes, we treat each student as an individual and provide the enrichment and support needed. By melding traditional expectations of regular homework and disciplined studies with current research, we offer dynamic and engaging lessons that prepare each student for future success. It is our emphasis on all aspects of learning that ensures our programs meet and exceed the Ministry of Education standards.

### Community

We know it takes a strong community to assist a child to develop, and our community is outstanding. At Newton's Grove, education is a partnership between parent and teacher, supported by a dedicated administration with students at the center. This approach ensures that students receive the time and attention they need through teamwork and cooperation. As they grow their confidence and understanding, every student is supported to speak up, take care of one another, and make a difference in society.

Helping our students grow for almost 50 years

### Our Main Campus

In 2017, on our 40th anniversary, we moved into our permanent home at 6850 Goreway Drive, in Mississauga. Each student benefits from a state-of-the-art building, designed to welcome and inspire every mind.

The school engages each student by welcoming them into a bright, modern, and vibrant space. The central atrium hosts living trees and allows students to plant, tend, and harvest gardens. Every classroom has a robust infrastructure to support innovative teaching. Technology is an integrated tool for learning as part of our Bring Your Own Device (BYOD) program. Two fully equipped science labs and our tech lab encourage students to develop knowledge and skills in STEM. The visual arts room, drama room, stage, and music room, which houses our Instrumental Music Program, inspire each student to develop their talents through outstanding programming in the arts.

Our impressive 32,000 sq. ft. Athletic Centre, which opened in the fall of 2021, enables every student to engage in outstanding physical education, athletic training, and sports in an immense double gym, well-equipped weight room, and fitness and dance studios. Our second floor running track adds a new dimension to every student's experience. Our state-of-the-art building has the resources, equipment, and facilities to inspire each student to strive to achieve their best in all areas. This is a place where students grow.

### Green Space

Field studies, nature hikes, fitness runs, and a wide range of athletic activities are all part of our outdoor programming. Students are supervised with care as they play and learn in the park throughout the seasons. This natural, healthy environment is what each Newton's Grove student experiences every day.

**OUR CAMPUS IS WRAPPED AROUND BY PAUL COFFEY PARK, GIVING ACCESS TO GREEN SPACE UNRIVALLED IN THE GTA. STUDENTS ENJOY OVER 100 ACRES OF FIELDS, PLAYGROUNDS, AND TRAILS, WITH SOFTBALL DIAMONDS, SOCCER PITCHES, TENNIS COURTS, AND EVEN A CRICKET PITCH RIGHT IN OUR BACKYARD.**

**Our Values: Reason, Respect, Responsibility**

## OUR ETOBICOKE CAMPUS

Welcome to our new Etobicoke Primary Campus - a warm, light-filled space where our youngest learners, from Pre-K to Grade 3, take their first steps in education.

Here, children learn in a close-knit community that celebrates curiosity, creativity, and collaboration. Every classroom is thoughtfully designed to support hands-on discovery and joyful learning, guided by the same early years program that is the hallmark of a Newton's Grove Education.

Students at the Etobicoke Campus are part of the larger Newton's Grove community, connecting with peers and teachers across both campuses through shared events and experiences. As they grow, they seamlessly transition to our Main Campus in Mississauga, continuing their educational journey with confidence and a sense of belonging from Grade 4 onward.

At Etobicoke, every child is known, nurtured, and inspired, growing roots that will carry them through a lifetime of learning.

**OUR ETOBICOKE PRIMARY CAMPUS IS DESIGNED SPECIFICALLY FOR PRE-K TO GRADE 3 LEARNERS - A BRIGHT, NURTURING ENVIRONMENT WHERE CURIOSITY AND CONFIDENCE TAKE ROOT.**

**HERE, CHILDREN EXPLORE THROUGH HANDS-ON LEARNING, GUIDED BY CARING TEACHERS WHO SPARK WONDER AND GROWTH EVERY DAY. WITH SMALL CLASS SIZES, NATURAL LIGHT, AND A STRONG SENSE OF COMMUNITY, STUDENTS BUILD THE FOUNDATIONS FOR LIFELONG LEARNING.**

# A Newton's Grove Education

## JUNIOR SCHOOL

### Early Years at Both Campuses

Our full-day early years program builds a solid foundation for each of our youngest students.

Literacy and numeracy are developed through interactive activities that encourage communication, participation, and critical thinking. French, Stem, Physical Education, and Music Programs are key components beginning in Kindergarten.

By Grades 1 and 2, focused and integrated lessons in spelling, grammar, and phonics further the development of strong and enthusiastic reading and writing. Daily learning in mathematics emphasizes a balance of mastering basic facts and developing problem solving skills.

Our well-rounded and inspiring approach gives each Newton's Grove student a strong academic foundation while fostering their natural curiosity and an ongoing love of learning.

### Grades 4 and 5 at our Main Campus

Our programming in Grades 4 and 5 enables each student to expand and build upon the foundation established in the earlier grades. Inquiry-based learning continues to foster their inherent curiosity and critical thinking. Carefully designed daily homework emphasizes quality and care of preparation as a foundation for lifelong success. Each student continues to be given more complex tasks that require independent thought and effort.

Each student participates in our Science Fair, with its emphasis on creative research and the application of scientific methods. Our public speaking program allows each student an opportunity to hone their skills and participate in Newton's Grove's very own Art of Speaking competition. These annual events engage each student in original and challenging work through to Grade 12.

By the end of Grade 5, each student is developing their ability to be an independent thinker with knowledge, skills, and work habits that will support success in high school, university, and beyond.

## MIDDLE SCHOOL

### Grades 6 to 8 at our Main Campus

Grades 6, 7 and 8 are carefully designed transitions that effectively prepare each student for opportunities to come in Senior School.

The Middle School program enables each student to successfully and happily negotiate changing social dynamics while developing the ability to assume greater responsibility.

The Academic Program is increasingly taught by specialist teachers, experts in their subject who know and care for each student. The ability to manage an increased workload is carefully developed as each student learns how to think conceptually at a deeper level and make connections across fields of knowledge. Effective study habits and test-taking skills are developed as every student is taught how to manage their time, maintaining and relying upon their Edsby calendar.

Each student in these years develops greater independence, learning how to thrive with greater freedom and increased responsibility and accountability. Our Middle School Program ensures each student develops the discipline, conceptual thinking, and self-reliance to excel in high school.

## SENIOR SCHOOL

### Grades 9 to 12 at our Main Campus

The main goal of the Senior School years is to enable each student to pursue their passion in the post-secondary program of their choice. To get there, we make increasing demands upon our students, both academically and personally. Lessons become more rigorous, with greater emphasis placed on the development of problem-solving skills and creative solutions.

Beginning in Grade 9, we deliver an engaging and achievable program that leads students to be able to confidently choose to complete a number of Advanced Placement (AP) courses. Our expert Student Success advisors guide each student through an exploration of their options, ensuring each student has a clear and effective path to their desired post-secondary program. As the academic load increases, so do leadership opportunities. A student may choose to join a variety of councils and clubs, be part of our Prefect Leadership Program, and take on other leadership roles. Volunteering is widely embraced, with most students accumulating far more than the mandated community service hours. These opportunities and high expectations mean our graduates each routinely earn offers of acceptance into their chosen program and thrive there.

# Signature Programs

## STEM

Our building is designed to support our commitment to STEM. Our two fully equipped science labs enable hands-on experimentation and exploration of natural phenomena. The rigorous application of the scientific method and innovative thinking are stressed in preparing each student for the future. Beginning in Grade 4, students learn by participating in our Science Fair, with winners advancing to the Peel Region Science Fair.

Our program is validated by the fact that the most popular post-secondary acceptances our students earn are in applied and hard sciences. Our robust innovative curriculum supports our teachers in integrating technology as a tool for learning in creative and inventive ways. Our own curated AI curriculum spans the younger years through to high school, and prepares students for future careers, making them adaptable and designed for growth and change. Our program ensures we can challenge and support our students as technology continues to evolve.

## Athletics

Our Signature Athletics Program provides an essential balance to our rigorous academics. We are a founding member of the Private Schools Athletics Association and a member of the Small Schools Athletic Association.

With over 60 varsity teams annually, we continue to produce numerous award-winners. We also engage students in many intramural programs for all ages, with an emphasis on fun, teamwork, and good sportsmanship. These programs build essential skills and ensure that everyone gets a chance to participate. In all our athletics, we stress the value of training and physical conditioning.

Our program ensures every student incorporates activity into their daily lives to experience the benefits of sport and physical activity. Our new, state-of-the-art athletic complex has outstanding training facilities and equipment. Our double gym allows us to run several different programs simultaneously.

## The Arts and Music

Our Signature Arts Program is designed to stimulate creativity by engaging each student to go beyond in drama, music, and visual arts. From the youngest grades, our approach to visual arts encourages every student to look at the world in new ways. Our building facilitates this learning in our impressive art studio. Students explore form and function in different media to aid their ability to express themselves.

Drama is a celebrated component in each school with three major productions per year. After countless hours in rehearsal, students enjoy putting on public performances. Our drama program allows each student the opportunity to breathe life into a character, to take artistic risks, and to build confidence through a collaborative effort.

Our Signature Music Program engages every student in developing outstanding creative and technical ability. In the early years, students learn to read music and are taught choral and solo singing. In Grade 5, each student enters our Instrumental Band Program, beginning a path towards mastery of their chosen instrument. The discipline and demands of playing reinforce the benefits of hard work and practice. By the time students are in Middle School, they may be selected for our Enriched Program, and may be eligible to earn a reach ahead credit in Grade 9 Music. In Senior School, a student may join our Jazz Band, select ensembles, and take courses in Advanced Musicianship.

**OUR MUSIC STUDENTS SUCCESSFULLY AUDITION FOR THE PROVINCIAL HONOUR BAND, NATIONAL YOUTH BAND OF CANADA, AND SHOWCASES AT CARNEGIE HALL AND IN EUROPE.**

One of the highlights of our school year is our annual Arts and Music Nights where school bands, choirs, and soloists perform at a level far beyond what one would expect from musicians so young. Students from across the grades also showcase outstanding talent and creativity in visual art.

As a foundation, our focus on the arts stimulates creativity with engaging, inspiring, and enjoyable activities where each student feels safe to try something new and go deeper.

## Advanced Placement Program (AP)

As a university preparatory school, we enable each graduate to achieve admission to their post-secondary programs. We also ensure they are well prepared to achieve at a high level in the next step of their educational journey. We employ the Advanced Placement program, mediated by the College Board, to provide every student with the opportunity to complete university-level work in high school and be well prepared for a seamless transition to university. Many students earn university course credits and enroll directly in courses beyond the first year. Universities actively seek students who participate in AP courses because they are well-equipped to thrive in their first year of university and beyond.

Beginning in Grade 9 at Newton's Grove, our carefully designed and enriched academic program enables each student to develop enhanced knowledge, skills, and attitudes gradually and effectively over four years. Our approach delivers a combined pre-AP/AP program, enabling every student to complete university-level work in high school with a rewarding amount of challenge and success. As a result, our students choose to write AP exams in May of their final year with a high degree of confidence that they will earn university credits.

## Global Learning

At Newton's Grove, the Global Learning Program offers students rich, carefully designed opportunities to explore the world and deepen their understanding of diverse cultures. Through experiences such as leadership camps, music trips to Cuba, language immersion in Quebec, and European adventures, students develop global awareness while building confidence, independence, and leadership skills.

Each trip is more than a destination - it's a chance to grow. Students strengthen their sense of community, form lasting friendships, and return with a broader perspective on their place in the world. These experiences support their academic journey and help shape them into thoughtful, capable global citizens.
